SHEER CURTAINS

The Zaab Range of ready-to-hang sheer curtains offers an abundance of sophisticated attributes, suitable for a diverse range of interior decorating schemes.

Crafted using a robust polyester yarn, we choose polyester for its softness and durability—ideal for everyday living. It provides generous light filtration and anti-mould properties, allowing for easy ongoing maintenance and excellent colourfastness.

ROOM DARKENING

The Room Darkening Curtain Range combines functionality with elegant design, making it a versatile addition to a variety of interior styles.

Featuring a triple-weave construction, these curtains are crafted from high-quality polyester yarn, offering a soft yet durable finish - ideal for everyday living. The triple weave enhances their room-darkening properties, ensuring improved light control and insulation. The fabric's anti-mould qualities make it low-maintenance, while its high colourfastness ensures lasting vibrancy.

Each Room Darkening Curtain is specially treated to provide superior light control during the day and complete privacy at night.

Room Darkening - Concealed Tab Amelie

ZAAB

Amelie features the unmistakable pure luxury of 100% French flax linen. Smooth, crisp and cool, 100% linen creates a stunning sophisticated, yet relaxed look. Amelie curtains are lined with triple weave fabric reducing light and glare while protecting the natural linen fibres. A functional and stunning window covering solution.

WINDOW BLINDS

The range of ready to hang Roller Blinds offer an abundance of sophisticated attributes suitable for a diverse range of interior decorating schemes.

All Blinds are crafted using a robust composition of either Polyester or PVC which makes them suitable for areas that attract a lot of moisture. Both materials offer a supreme level anti-mould attributes: allowing for easy on-going maintenance and high colourfastness durability.

Blockout - Roller Blind Solvía

ZAAB

The Solvia Roller is crafted from 100% polyester blockout fabric. Designed for both practicality and style, this blind features a finely woven horizontal texture that adds a sense of depth and softness to the overall finish. It's blockout properties provide excellent light control and privacy, making it suitable for a variety of spaces. The fabric's clean modern look complements contemporary interiors as well as being durable and stylish.

THE DIFFERENCE IS QUALITY

At Zaab and Filigree, we are passionate about design. Our Readymade window furnishings are inspired by the hustle and bustle of every day living. Attention to detail and quality are at the heart of every creation, making them not only beautiful, but a truly luxurious addition to your home.

We choose to use predominantly Polyester fibres for their robust durability and soft composition suited to daily living. Our products are built to last and to withstand the busy home environment, using a combination of materials sourced and made by world-class manufacturers.

We are one of the only curtain and blind suppliers that has our own fully in-house Quality Assurance team and lab, along with our talented Product Development team, we spend months perfecting the balance of our fibres before a product is released.

Every single production batch of our products are inspected to ensure they meet the highest standard before they are packaged and shipped to you. We know that this kind of care is a necessary part of the quality we promise. The result? Products that weather busy homes and stand the test of time.

GENERAL CURTAIN CARE

Treat spots and spills immediately with warm water and a paper towel. Blockout curtains should not be dry-cleaned. We recommend caring for your curtain by only doing a cold hand wash. Please do not bleach, soak, rub, wring or tumble dry.

For drying purposes, ensure that the curtains drip dry in a shady area and always avoid touching the curtain coating when wet. To remove creasing, hang the curtains in a warm place – the creases will disappear after a few days. Alternatively, you can use a dry iron, but only on the fabric side.

GENERAL BLIND CARE

We recommend gently vacuuming your blind with a soft brush attachment. Please do not wash or iron. If necessary spot clean with a damp clean sponge on a flat surface, using warm water and dissolved soap flakes. Sponge with fresh water and dry gently with a clean towel. It is always recommended to test in an inconspicuous area before spot cleaning.

CURTAIN PLACEMENT AND SIZING

Well-proportioned curtains can tie an entire room together, but it can be tricky to get the desired size and placement right for each individual window space. A curtain should be large enough to fully cover your window with a recommended spillage of roughly 10-20% either side dependent on your wall area. Allowing for spillage will prevent exterior view obstruction when the curtains are fully open.

When choosing a curtain, it pays to consider the area that the curtain is for and determine the sizing specifically for that window area. When gathering your window measurements you should always consider a side or center open. Having a center open will require multiple curtain panels. Some curtain products come sold as a pair and some come sold as a single. Please read the attributes of each curtain design carefully before choosing a curtain product.

CENTER OPEN

Ideally, a center open has 2 or more single curtains depending on the size of the window area.

SIDE OPEN

Ideally, a side open will have 1 large single curtain depending on the size of the window area.

SHEERS

Ready to hang sheer curtains come packaged as a single curtain. If you would like a center open, we recommend you purchase two single curtains. Please use to the following guides as a rough estimate to help you achieve your desired window furnishing outcome.

BLOCKOUT & ROOM DARKENING

Ready to hang blockout and room darkening curtains come packaged as either a single or pair of curtains. Please refer to the attribute section below each product for specifics. If you would like a center open, we recommend you purchase two single curtains, unless the product comes sold as a pair.

BLIND PLACEMENT AND SIZING

A blind should typically be large enough to cover the width of your window when installed, and the length of your window when fully extracted. When choosing a blind, it pays to consider the area that the blind is for and determine the sizing specifically for that window area. When gathering your window measurements you should always consider an inner or outer frame mount first. An inner frame mount means the blind is installed on the inside of the window frame. An outer frame mount means the blind is installed on the outside of the window frame.

INNER FRAME MOUNT

Ideally, the blind should be large enough to cover the width of your window when installed, and the length of your window when fully extracted.

OUTER FRAME MOUNT

Ideally, the blind should be large enough to cover the width of your window when installed, and the length of your window when fully extracted.

It is important to note that a blind installed on the inside of the window frame will result in small gaps either side of the fabric due to the way the bracket system extrudes. If you would like to achieve full blockout we encourage you to install your blind on the outer window frame. Please read the attributes of each blind product carefully before choosing your blind.

Head to www.basfordbrands.com or [@basfordbrands](https://www.facebook.com/basfordbrands) on Facebook for the ultimate collection of window furnishing inspiration.

COLOUR REFERENCE

Please note all photography in this catalogue is intended as a visual representation only. Although care is taken to ensure images are not misrepresented, colours are not exact matches due to variance in printer standards and monitor calibration. For any specific inquiries concerning colour swatches please contact our customer service team or speak to your sales representative.

SIZE REFERENCE

Please note all illustrative diagrams in this catalogue are intended as a visual representation only. Although care is taken to ensure sizes are not misrepresented, the diagrams and tables should be strictly used as a rough guide only and must not be assumed as exact. Please note that all "To Fit Window" sizes in the provided tables are based off average sized windows.

We encourage you to take your time measuring your window. Our advice is given in good faith and should not be considered a guarantee. If in any doubt, always consult a professional. For any specific inquiries concerning product sizing please contact our customer service team or speak to your sales representative.

CARE

Please refer to your care label that will be located either on the product packaging itself or on the soft goods hang-tag/ label sewn on the seam of your item. Always refer to your care label before attempting ANY cleaning. Treat spills and stains as soon as possible to make stain removal easier and to minimise the risk of permanent damage. Our advice is given in good faith and should not be considered a guarantee. If in any doubt, always consult a professional cleaning company.

If your window measurement is larger than our "To Fit Window" guide, or is too big for a particular pair of curtains we strongly recommend you purchase multiple single curtains to cover the entirety of the exposed window area, while still allowing for our 10-20% spillage rule. If you are still unsure please contact our customer service team or speak to your sales professional.

INTERIOR DESIGN TIP!

Hang your curtains higher on your window to make your windows appear larger and your ceilings taller. This will also give the illusion of a more spacious area.
